\$RAIDEM to Earn

Version 1.0

February 2025

Overview

RAIDEM is an innovative cryptocurrency built on the Solana blockchain designed to reward community members—called "Raiders"—for engaging with social media content. The platform incentivises participation by rewarding Raiders for their engagement with crypto projects' social media content. RAIDEM also offers a unique service where projects can pay to boost their social media presence through real, human-powered raids (not bots), ensuring authenticity and high-quality interaction.

Additionally, RAIDEM creates a self-sustaining ecosystem by burning a portion of the revenue, which increases the scarcity and value of \$RAIDEM tokens. Raiders can earn rewards from their engagements.

Mission Statement

RAIDEM aims to provide a transparent, rewarding, and effective way for crypto communities to enhance their social media presence while compensating Raiders for their valuable engagement. By utilising human-powered raids, RAIDEM plans to create an ecosystem where every participant benefits from the network's growth. We strive to become a leading force in social media growth for crypto projects.

Core Features

1. Raider Engagement Rewards

Raiders earn rewards in \$RAIDEM tokens by engaging with partner projects' content in the following ways:

- Liking, retweeting, commenting on posts.
- Following social media accounts of participating projects.
- Sharing promotional content on social media.
- Supporting activities like campaigns and events organised by RAIDEM.

These engagements are tracked and rewarded automatically through the RAIDEM bot and human participation, ensuring a smooth experience for all Raiders.

2. Human Raids as a Service

For a fee, projects can hire Raiders to perform actions such as:

- Liking, retweeting, commenting, and sharing posts.
- Increasing engagement on social media platforms.
- Driving more attention and traffic to their content.

By using real human engagement, RAIDEM ensures that all interactions are authentic and high-quality, making it more effective than bot-based services.

3. Raider Tier System

Raiders are divided into four tiers based on the amount of \$RAIDEM tokens they hold in their wallet. The tier system provides additional perks and higher rewards for more active participants:

- **Bronze:** Hold at least \$100 worth of \$RAIDEM tokens.
 - Access to basic social media engagement rewards.
- **Silver:** Hold at least \$500 worth of \$RAIDEM tokens.
 - Enhanced social media engagement rewards.
 - Early access to new platform features.
- **Gold:** Hold at least \$1,000 worth of \$RAIDEM tokens.
 - Higher social media engagement rewards.
 - Access to exclusive Raider events and content.
 - Priority customer support.
- **Platinum:** Hold at least \$5,000 worth of \$RAIDEM tokens.
 - Maximum social media engagement rewards.
 - Access to VIP events, giveaways, and promotions.
 - Personal consultation and support from the RAIDEM team.

4. Raider Referral Program

Raiders can earn additional rewards by referring new projects to the platform. When a Raider successfully brings in a project that pays for human-powered raids, they will earn 5% of the RAIDEM tokens paid by that project.

- **Raiders must hold a minimum of \$100 worth of \$RAIDEM tokens** in their wallet to be eligible for using the RAIDEM bot and participate in the Referral Program.

Raidenomics

Total Supply: 1,000,000,000 \$RAIDEM

The total supply of \$RAIDEM tokens is distributed as follows:

- **30% – Rewards for Raiders** (300,000,000 \$RAIDEM)
Purpose: This portion is allocated to reward Raiders for their engagement with partner projects' social media content. Engaged Raiders will receive \$RAIDEM tokens for actions like liking, retweeting, and commenting.
- **20% – Liquidity Pool & Staking Rewards** (200,000,000 \$RAIDEM)
Purpose: This allocation provides liquidity for the \$RAIDEM token, making it easier for users to trade and stake their tokens. It also supports staking rewards, allowing users to lock their \$RAIDEM tokens in exchange for additional tokens over time.
- **20% – Partnerships & Marketing** (200,000,000 \$RAIDEM)
Purpose: These tokens are allocated for strategic partnerships and marketing campaigns aimed at promoting RAIDEM and expanding its reach. Funds will be used to collaborate with crypto influencers, media outlets, and projects that can help bring awareness to RAIDEM.
- **15% – ICO Allocation** (150,000,000 \$RAIDEM)
Purpose: This portion is allocated for the Initial Coin Offering (ICO) to raise funds for the development, marketing, and expansion of the RAIDEM platform. These funds will be used to support the growth of RAIDEM and attract new investors, while maintaining the ecosystem's sustainability.
- **10% – Founders and Team** (100,000,000 \$RAIDEM)
Purpose: These tokens are allocated to the founders and the team behind RAIDEM. This ensures the long-term success of the project by incentivizing the team to continue developing the platform and pushing for growth. This allocation will be vested over time to ensure the team remains committed to the project.

- **5% – Burn Mechanism** (50,000,000 \$RAIDEM)

Purpose: A portion of every transaction and service fee will go toward burning tokens. This reduces the circulating supply over time, increasing the scarcity and value of the remaining tokens.

	\$RAIDEM	RAIDENOMICS	SUPPLY & ALLOCATION
Category	%	Total Tokens	Purpose
Rewards (Raiders)	30%	300 Million	Rewards for active Raiders
Liquidity	20%	200 Million	Ensuring smooth trading on DEX's
Marketing	20%	200 Million	Marketing funds to help with growth across all media
ICO	15%	150 Million	Public sale to fund liquidity and growth
Team	10%	100 Million	Founders, team members, and advisors (Locked for 1 year)
Burn Mechanism	5%	50 Million	Ensures deflation of \$RAIDEM Tokens
FIXED TOTAL SUPPLY		1 Billion	Total circulating supply of \$KRABZ

Sustainability Mechanisms

RAIDEM is designed to be a self-sustaining ecosystem through the following mechanisms:

- **Token Burn:** A percentage of every transaction and service fee is used to burn \$RAIDEM tokens, reducing the circulating supply and increasing the value of remaining tokens.
- **Human Raids as a Service:** The revenue generated by the human-powered raid service is used to fund development, support, and rewards, ensuring continuous operation and platform expansion.

Roadmap

Q1 - 2025: Development & Launch

- Development of \$RAIDEM token on Solana blockchain.
- Creation of \$RAIDEM bot-based rewards system.
- Branding & Social Media launch
- RAIDEM bot launch.
- Referral Program launch.

Q2 - 2025: Growth & Expansion

- Expansion of the referral program.
- Launch of human raids for partner projects.
- New features for the RAIDEM bot.
- Increased community engagement and partnerships.
- NFT Drop for Raiders.

Q3 - 2025: Integration & Scaling

- Integration of RAIDEM token into DeFi platforms for staking and liquidity.
- Scaling of referral programs and human raid services.
- Global marketing campaigns to boost visibility.

Q4 - 2025: Community Empowerment

- Release of exclusive NFT collections for Raiders.
- Strengthening community initiatives and rewards.
- Continued focus on sustainable growth for RAIDEM.

Conclusion

RAIDEM is revolutionising social media engagement in the crypto space by combining human-powered engagement with blockchain technology. By offering rewards, Raider NFTs, and a self-sustaining ecosystem through token burns and referral incentives, RAIDEM is creating a platform where both Raiders and crypto projects can thrive.

Join the RAIDEM movement and become part of the next generation of social media engagement!
